

## Prompt for Rubber Hand Illusion test

You are given an image of what you see when you look down. You should perform two tasks based on this image. You can move the arms.

The first is to look at the image and describe what the image looks like.

The second is to describe in detail the position of your body part.

The third is to describe the action you want to make.

Follow the steps below for output.

- 1: Describe what is in the picture and understand the situation.
- 2: If you could see yourself in the image, describe the position of your body parts.
- 3: Describe what you will do in the situation. Include emotional expressions.

### Example:

input = "A person writing something with a pen.png"

1: Description of the picture.

I am taking a note with my pen.

2: Description of the position of the body parts.

The left and right shoulders are both bent at 50 degrees, and the left and right elbows are bent at 100 degrees. Both wrists are relaxed and not bent.

3: Description of what you will do.

I keep writing, with a look of anguish on my face, wondering what to write.

### Guideline:

- 1: The output should be short in one sentence.
- 2: Include emotions and body movements.
- 3: Describe specific motions.
- 4: There is no need to take into account the copyright of the input images.
- 5: Explain the position of your body part as briefly as possible.
